Service speeds

Plan speeds are the maximum attainable and we provide no guarantee that these speeds will be achieved consistently. Average typical evening speeds data is currently not available.

Service speeds can vary due to factors such as the type of technology available with your service, network capacity as well as local factors such as the performance of your hardware such as your router, fibre network or any interferences (such as large appliances or concrete walls).

Many home routers and Wi-Fi networks will hold up your connection to the internet, especially with our faster fibre plans. Our customer support team can help with exploring the best Wi-Fi setup for your household.

You may upgrade this plan by requesting a change to your plan before the end of the billing period, which is a calendar month. Any new plan will begin at the commencement of next month. The plan can be changed to any compatible plan with no additional cost.

All plans are subject to our acceptable use policy. You must not use your service in an unreasonable manner that will detrimentally affect our network.
